Cloud solutions implementation

Migration and optimization of cloud infrastructure

FOUNDER

Mikhail Peraviortkin — 18+ years in software development

Mikhail Peraviortkin is the founder of MiCode. For over 18 years he has built software — from enterprise systems in Java and Oracle to AI-powered products. He worked on projects for Nokia, built supply-chain systems with AI agents (RAG, Text2SQL, 300+ REST endpoints), and ran the technical blog oracle-adf.info with 400,000+ views. Today at MiCode he turns that experience into practical AI tools that help businesses automate routine work and make data-driven decisions.

Career highlights

Nokia (2015-2020)

TO, Workflow, Mounting, Dispatch Tool projects

Various companies (2006-2024)

Enterprise solutions: ExpertMe, Stitch, Butik, Harcord, Migrator, S3Traf, iMind
